## **CEER Training on Benchmarking** **19 October 2015, Brussels**

### Course Overview

#### Designed for:

Experts from National Regulatory Authorities with previous experience in benchmarking tasks in electricity and gas.

#### Programme overview:

- Explore the fundamentals of benchmarking electricity and gas DSO/TSO networks in the context of network tariff regulation – definitions, methodologies and real practices
- Exchange experience and lessons learnt and gain new input for NRAs' benchmarking tasks
- Discuss scientific approaches and different methodologies together with national and international practical examples

With lecturers the National Regulatory Authorities (NRAs) as well as research industry, this course provides participants with a unique opportunity to exchange knowledge with experts in the field of benchmarking.
