Why attend CEER Training Courses ?

“ *Effective regulation relies on expert and experienced staff. Capacity building and investing in professional development are powerful tools to strengthen regulatory performance.* ”

Lord Mogg, CEER President.

The CEER Training Academy's courses deliver job-related skills for staff of regulatory authorities across all levels, from introductory to advanced. Our modular approach in designing the course programme supports over time the development of professional expertise in energy regulation, covering wholesale market, network and retail/consumer issues. Designed around European experience and practices, the courses also allow for the sharing of regulatory experience and approaches more broadly.

Our lecturers come primarily from the regulators and also include international institutions, academia and energy industry professionals. The course programme is advised by distinguished members of our Training Academy Advisory Board, comprising senior representatives from the European institutions, academia, energy industry and former regulators.

The CEER Training Academy programme is built around three key features:

- 1 PRACTITIONER METHOD**
Practical topics relating directly to energy regulation for on-the-job and professional development
- 2 REGULATOR-CENTRIC**
Designed and led by regulators for regulators, with exclusive access to leading experts in the energy sector
- 3 COLLABORATIVE ATMOSPHERE**
Exchange views and learn from peers in the regulatory community from across Europe and beyond

In 2016

9

9 CEER training courses

130

130 staff trained from 26 energy regulators

61

61 lecturers from 18 countries

87%

87% participant course satisfaction

“ *I am very satisfied. I found out things which I need for my everyday work. I had questions to which I got answers. Lecturers were extremely helpful and cooperative.* ”

One participant of the REMIT training 2016.

“ *The training was useful and well focused on interesting issues. Good mix of theory and practice. I have gathered a lot of useful hints for further studying and reflections.* ”

One participant of the Specialised Training on Network Tariffs for Transmission and Distribution 2016.
