

Conclusions and way forward

Brussels, 18 February 2009

Conclusions for the further development of ERGEGs principles

- Need to carefully assess impact of proposed principles and rules (e.g. short term congestion/renomination, marketing platform...)
- Interactions with other issues (tariffs, transparency) which are not at the core of this document
- Need to further develop the incentives issue in the proposed ERGEGs principles
- Need to further develop the buy-back proposals
- How to get more blue, i.e. firm day-ahead capacity vs. interruptible capacity

Way forward

- Slides and synthesis of this workshop and today's discussion will be available shortly on the ERGEG website
- End of the public consultation: 20th March 2009
- ⇒ All comments received during the consultation process will be taken into account during the drafting of the final version of ERGEGs Principles => this is an open process!
- Impact of ERGEGs proposals will be assessed
- Final version of ERGEGs Principles on CAM & CMP to be published by summer
- Possible recommendation to the European Commission to launch a comitology process on CAM and CMP

Thank you for your participation!
