

## **EREG Letter to storage users**

### **Monitoring of the implementation of the Guidelines for Good Practice for Gas Storage System Operators (GGPSSO)**

#### **Introduction**

The Guidelines for Good TPA Practice for Storage System Operators (GGPSSO) set out the minimum requirements for the provision of fair and non-discriminatory access to gas storage (in accordance to the Gas Directive<sup>1</sup>). Monitoring implementation of the GGPSSO is therefore important in understanding how access to gas storage is being provided.

The European Commission requested the European Regulators Group for Electricity and Gas (EREG) to monitor the implementation of the Guidelines and report back to the next Madrid Forum on their findings.

This paper seeks views from storage users – be they actual storage users or potential storage users - on how the GGPSSO have been implemented by storage system operators (SSOs).

#### **Invitation to comment**

EREG is committed to open and transparent consultation. The GGPSSO were developed through consultation over a number of months. EREG has already sent out questionnaires in order to collect information from EU Storage System Operators (SSOs) and National Regulatory Authorities (NRAs). These questionnaires are published on the EREG website. Please note that responses to the questionnaires will also be published on the EREG web site at the end of June.

At this stage of the process, EREG would like to consult users, since they are actively participating in the storage market and therefore should provide the best insight as to whether and how the GGPSSO have been implemented or its provisions circumvented. Accordingly, EREG has prepared a list of questions for users.

The results from the monitoring process will be crucial in identifying the effectiveness of TPA to storage and areas where the GGPSSO may be improved. Your response to this questionnaire is therefore important to the development of the EU regulatory framework.

Any responses should be received by **25 July 2005**. They should be sent to:

To help ensure transparency, responses to the questionnaire and other documents associated with the GGPSSO will be published by placing them on the ERGEG website (<http://www.ergereg.org>). **EREGEG will take into account any requests to keep information confidential. ERGEG encourages you to separate confidential information from information you are willing to be made public.**

Any questions on this document should in the first instance be directed to Pierre-Marie Cussaguet and/or Rosita Carnevalini (see addresses/email above).

EREGEG intends to publish an initial report on the implementation of the GGPSSO in September 2005, and it expects to present these findings at the next Madrid Forum – therefore, ERGEG intends to issue a final report on implementation after it has an opportunity to consider responses to its initial report and the views of delegates at Madrid.

**Section1: open background questions**

*The objective of the monitoring of the GGPSSO is to find out whether and how the GGPSSO have been implemented. Questions addressing the actual compliance with the GGPSSO are presented in Section 2. However, the monitoring should also provide an overall view of the effectiveness of the GGPSSO. Therefore, the questions presented in Section 1 are designed to assess **how** the GGPSSO have been implemented and in particular whether the GGPSSO could be improved.*

**1.1 Do you believe implementation of the GGPSSO by SSOs has been effective?**

We believe, from our experience as users, that implementation of GGPSSO with deadline 1<sup>st</sup> April 2005 has been done properly.

**1.2 Apart from storage services, do you have sufficient access to other sources of flexibility in order to meet your commercial needs (e.g. hubs, production flexibility, import flexibility, long-term contracts, balancing market)? Can these other sources of flexibility be considered as effective substitutes to storage?**

Other services are available and we consider them not a substitute for storage but complementary to the service.

**1.3 Please indicate if the adoption of the GGPSSO has had a positive impact on TPA services (GGPSSO requirements on "Necessary TPA services", chapter 3)?**

As most of them have been implemented before the deadline impact from such date has not been relevant.

**1.4 Please indicate if the adoption of the GGPSSO has had a positive impact on storage capacity allocation/congestion management procedures (GGPSSO requirements on "Storage capacity allocation and congestion management", chapter 4)?**

As most of them have been implemented before the deadline impact from such date has not been relevant

**1.5 Please indicate if the adoption of the GGPSSO has had a positive impact on transparency. Would you say that as a user, you are provided with sufficient and timely information in order to gain effective and efficient access to storage facilities? What data would you like to see published? Why would you need this additional information (GGPSSO requirements on "Transparency", chapter 6)?**

As most of them have been implemented before the deadline impact from such date has not been relevant.

Regarding second question we don't have any problem with information we received, but we would prefer to have the information more frequently. In certain periods of the year (seasonal swings) more update information is needed

- 1.6 In nTPA, if the main commercial conditions including the prices for standard services are published, is there consistency between your contract and these published conditions (GGPSSO requirements on “Tariff structure and derivation”, chapter 7)?**

Yes as prices and services are provided by law.

- 1.7 Please indicate if the adoption of the GGPSSO has had a positive impact on secondary trade of storage capacity (GGPSSO requirements on “Secondary market”, chapter 9)**

Not applicable

- 1.8 Do you believe that there is a conflict between the requirements of the GGPSSO and national legislation that will materially affect either your interests or your ability to comply with the GGPSSO (GGPSSO Scope and Objective)? Please specify the nature of such conflict**

Not from our experience.

- 1.9 If you have entered into a new storage contract after the adoption of the GGPSSO (18 March 2005), do you believe that there is a conflict between the requirements of the GGPSSO and certain clauses of your contract (e.g. publication of certain data, day-ahead release of non-nominated injectability and deliverability)? Please specify the nature of such conflict**

Not from our experience

- 1.10 Do you believe there are gaps in the GGPSSO? How could the effectiveness of third party access to storage be improved?**

Not identified major gaps.

**2 Section 2: monitoring of the implementation of the Guidelines for Good Practice for Gas Storage System Operators (GGPSSO)**
