Why attend CEER Training Courses?

The CEER Training Academy's courses deliver job-related skills for staff of regulatory authorities across all levels, from introductory to advanced. Our modular approach in designing the course programme supports over time the development of professional expertise in energy regulation, covering wholesale market, network and retail/consumer issues. Our course programme is constantly updated to cover new developments and new frameworks in the energy sector, focusing on new challenges for the energy regulators. Designed around European practices, the courses also allow for the sharing of regulatory experience and approaches more broadly.

Our trainers come primarily from the regulatory authorities and also from international institutions, academia and the energy industry. The course programme is advised by distinguished members of our Training Academy Advisory Board, comprising senior representatives from the European institutions, academia, the energy industry and former regulators.

“

The CEER Training Academy is where national energy regulatory authorities in Europe go to be trained on the day-to-day job of being an energy regulator. We are also committed to sharing our experiences and expertise with energy regulators from around the world and regulators outside of the energy sector.

Annegret Groebel,
CEER President

THE CEER TRAINING ACADEMY PROGRAMME IS BUILT AROUND THREE KEY FEATURES

1

PRACTITIONER METHOD

Practical topics relating directly to energy regulation for on-the-job and professional development

2

REGULATOR-CENTRIC

Designed and led by regulators for regulators, with exclusive access to leading experts in the energy sector

3

COLLABORATIVE ATMOSPHERE

Exchange views and learn from peers in the regulatory community from across Europe and beyond

“

It was a great opportunity to engage with experts from other National Regulatory Authorities and from European Institutions and to discuss the best regulatory practices for the implementation of REMIT. I understood better the legislative framework for REMIT and found out a lot of interesting views on the subject from our trainers.

One participant of the Training on Introduction to EU Regulation on Energy Market Integrity and Transparency (REMIT) - Module 1 in 2019.

“

I attended the CEER training for the first time and I was satisfied with everything – the organisation, content of the training, trainers and atmosphere.

One participant of the Specialised Training on Legal and Regulatory Challenges for National Regulatory Authorities in 2019.
