

Webinar on CEER Report on Power Losses in European Electricity Grids

Wednesday, 28 May 2025, 13:00 – 14:15 CEST
Online

This webinar will present the findings of the 3rd CEER Report on Power Losses, which analyses how power losses are defined, calculated, and regulated across 40 European countries. The session will highlight key trends, regulatory practices, and efficiency challenges in transmission and distribution networks.

Opening Remarks and Keynote Speech (5 mins)

Power losses have been assessed at the European level for over a decade. Previous studies by CEER and the European Commission explored methodologies and regulatory approaches. This third CEER Report extends prior analyses, using improved calculation methods and expanded data collection from National Regulatory Authorities.

- **Veli-Pekka Saajo, Deputy Director General of the Energy Authority Finland, Chair of the Distribution Systems Working Group CEER**

Presentation of the 3rd Power Losses Report (35 mins)

This part of the webinar will present the key findings and recommendations from the report, highlighting variations in power loss definitions, current practices across countries, and proposed measures to improve efficiency, accuracy, and regulatory consistency.

- **Michael Westermann, Deputy Head of Section (Energy Regulation) Bundesnetzagentur, Energy Quality Supply Workstream Co-Chair, CEER**

Sector reactions (25 mins)

This part of the webinar will bring together experts and stakeholders to explore the report's key findings and discuss practical implications for the energy sector.

- **Charles Esser, Secretary General E.DSO**
- **Carlos Castel Conesa, Team Lead Expert Groups & Task Forces EU.DSO Entity**

Q&A and Closing remarks (10 mins): Veli-Pekka Saajo, Deputy Director General of the Energy Authority Finland, Chair of the Distribution Systems Working Group CEER
