

## CEER Webinar: Making Europe's Energy Networks Work – Investment, Efficiency, and Regulatory Insights

**Tuesday, 10 February 2026, 13:00 - 14:00 CET**  
**Online**

---

This webinar will present the findings of CEER's report "*Regulatory Frameworks for European Energy Networks 2025*", which provides an overview of the regulatory systems applied to electricity and gas transmission and distribution networks across CEER member countries and selected Energy Community Regulatory Board members.

The session will highlight key regulatory approaches to setting allowed revenues, incentives, and investment conditions, and discuss how national regulatory practice can inform EU-level policy debates on grid investment, efficiency, and the energy transition.

[Access the full report here](#)

### Opening Remarks (5 mins)

- **Pedro Verdelho**, Vice President & Gas Working Group Chair, **CEER**

The relevance of the report in the context of Europe's evolving energy system and EU policy priorities.

### Presentation of the CEER Regulatory Frameworks Report 2025 (15 mins)

- **Dr. Franziska Henrich**, Incentives Regulation and Efficiency Benchmarking Workstream Co-Chair, **CEER**

This section will provide an overview of the report's key findings, covering:

- Determination of allowed revenues, including RoR and RAB
- Depreciation methodologies and asset valuation approaches
- Incentive mechanisms for efficiency, quality, and investment
- Key similarities and differences across national regulatory frameworks

### Stakeholder reactions (25 mins) – Moderated by **Raphael Hanoteaux**, Deputy Secretary General, **CEER**

Stakeholders will respond to the report's findings and share their views on regulatory frameworks, investment incentives, and future challenges for electricity and gas networks.

- **Nicolò Rossetto**, Research Fellow, **Florence School of Regulation**

Reflections on the report and EU policy debates on grids, incentives, and the energy transition.

- **Dr. Rainer Pflaum**, CFO at TransnetBW and Convener of the ENTSO-E the Finance Advisory Group, **ENTSO-E**

An electricity TSO perspective on network regulation and incentive design.

- **George Wüstner**, Director of the Market Area, **ENTSOG**

Reaction from a gas TSO perspective on investment needs and the role of gas infrastructure in enabling the energy transition.

**Q&A and Closing remarks: **Raphael Hanoteaux**, Deputy Secretary General, **CEER****
